

# Enhance your Décor with Roller Blinds, Modern & stylish the ideal solution for heat and light control!

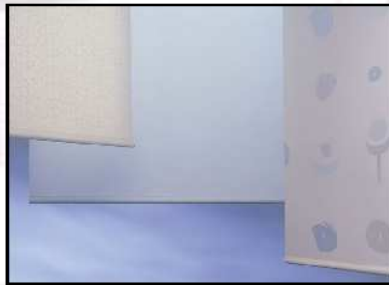

## Roller Blinds

Addstyle roller blinds provide a functional and attractive answer to sun control in all areas of your house or commercial property. Roller blinds can be selected in an exciting range of colours for traditional look with scallops and braid, or the ultra modern sleek design with cassettes and aluminum base rails.

Roller blinds can be ordered with chain or spring control, soft lift assisted chain operation and can be motorized with remote control or hardwired and can be connected into C-Bus system.

Addstyle roller blinds are manufactured to exacting specifications with state –of-the-art ultrasonic equipment. All the internal tubing is extruded aluminum and chain winders are of excellent quality and maintenance free

Addstyle rollers have the option of metal or U.V stabilized plastic operating chains and come with child safe tension **device**.

## Double Roller Blinds

Double Roller blinds allows two blinds to be neatly fitted with only one pair of fixing brackets. So you can have the convenience and functionality of different fabric types may be combined onto one window. Sunscreen and blackout fabrics may be combined for day and night privacy while maintaining views of the outside during the day. As its name implies, Double blinds lets you combine two kinds of fabrics (such as a blackout and sunscreen) on one easy to use system, without positioning two sets of brackets. Double Roller blinds provides total flexibility in the combinations of fabrics, so that many different functions can be achieved
